Ancient Ancestry

The Artisans -- R1b1b2:

Ancient Ancestry haplogroup R1b, the Artisans, first arrived in Europe from west Asia about 35,000- 40,000 years ago at the dawning of the Aurignacian culture. This culture was remarkable for its subtle yet significant technological progress, like the shift from random flint collection to the use of a single stone core to shape flint tools as needed. Aurignacian decorative beads and jewelry could also be the first sign we have of the

uniquely human quality of self-awareness and adornment. Additionally, some anthropologists believe that the Aurignacian culture was the first to paint. Either way, the people of this time period left behind fascinating cave paintings in

France, Spain and Portugal.

Ancestry.com DNA Overview - Discover genetic genealogy and ancient ancestry with a DNA cheek-swab test. Find leads based on DNA testing, surnames, geography and haplogroups. Expand your family tree, find potential genetic cousins, see maps and make connections. Learn about the science, lab work and value of your genes in tracing your personal family history. We explain and help you choose a mitochondrial (mtDNA) or Y-chromosome lineage test in a few easy steps.
